RAPIDSTOP TOURNIQUET

Ratchet mechanical advantage of 8:1; Easier and quicker to achieve high compression forces, particularly necessary for application on upper leg (thigh)

RATCHET

LEVER

Intuitive product-integrated application instruction on Lever (Step 2)

Simple, rapid application around trapped limbs: with just gross motor skills, the RapidStop® Tourniquet Quick-Clasp can be detached and reattached for application around a trapped limb - no dexterous strap routing required. 'QUICK-CLASP' can be opened and closed easily even when wearing gloves

QUICK-CLASP

STRAP

Minimum 600N tensile strength: 200N is typically the largest tensile force needed in a tourniquet to fully occlude blood flow in large thigh application. RapidStop® Tourniquet is designed with a minimum 3x factor of safety;

RapidStop® Tourniquet is designed for limb sizes circumference from 17.8cm / 7" (83.8cm / 33") this equates to the 1st percentile of female upper arm sizes up to the 99th percentile of male upper thigh sizes; encompassing the vast majority of adult limb sizes

Intuitive product-integrated application instruction on Label (Step 1)

LABEL

Mil-W-17337 spec; 3.8cm / 1.5" wide with 8,000N breaking strength and superior abrasion resistance

Time record label located behind d-ring strap, below quick-clasp

TIME-RECORD

D-RING

Large, rugged D-ring 5.1cm / 2" width (3.8cm / 1.5" height) makes it simple and quick to grasp

Instantaneous one-handed cinch vastly improves time to occlusion in all application scenarios. Easy and quick to apply; requires no stabilizing hand and supplies a mechanical advantage of 2:1 prior to effecting tightening mechanism [NOTE: a poorly-performed initial cinch is a typical cause for a tourniquet application failure.]

EASE OF USE

The RapidStop® Tourniquet allows for easy, single-handed application with the use of only gross motor control, ideal for fast self-application. The instantaneous one-handed cinch vastly improves time to occlusion. Combined with product-integrated application instructions, the RapidStop® Tourniquet enables an untrained user to apply the tourniquet with speed and reliability in an easy 3-step process:
