

MINING SOLUTIONS

CATALOGUE

HEALTHCARE,
WE MAKE IT
BETTER

WHEN DISASTER STRIKES

Mining operations operate in environments where the cost of delayed or inadequate emergency response is high – impacting safety outcomes, compliance, and business continuity.

Aero Healthcare addresses these challenges through integrated first aid and emergency response solutions designed for high-risk, remote, and industrial settings. Our range enables rapid trauma and bleeding control, effective management of burns and chemical exposure, immediate eye injury response, and sustained care in remote locations.

By standardising fit-for-purpose safety equipment across sites, mining operators can reduce incident severity, improve response capability, and demonstrate clear alignment with WHS obligations and operational risk management objectives.

FEATURES & BENEFITS

- **Built for Mining Environments**
Durable, high-visibility products designed to perform in harsh, high-risk conditions.
- **Faster Emergency Response**
Trauma, burn, and eye care solutions enable rapid on-site treatment to reduce injury severity.
- **Remote-Ready Solutions**
Supports extended response times where access to medical care is limited.
- **Compliance & Risk Reduction**
Standardised kits support WHS requirements and site safety audits.
- **Scalable Across Operations**
Consistent safety solutions for fixed sites, vehicles, and mobile plant.

An open first aid kit is shown lying on a grey concrete floor. The kit is a bright yellow-green bag with a black zipper. Inside, several modules are visible: a red module labeled 'Regulator BURNS MODULE' with a flame icon, a green module labeled 'Regulator CUTS & GRAZES MODULE' with a bandage icon, a purple module with a spiral icon, and an orange module labeled 'Regulator SNAKE BITE MODULE' with a snake icon. A yellow plastic bag is also visible. A person's hand is seen at the top left, and a person's leg in a striped sock is visible on the right side of the kit.

FIRST AID KITS

Introducing the Aero First Aid Station – the epitome of efficiency and comprehensive care. This all-in-one station provides swift access to a wide range of first aid supplies, ensuring readiness for any emergency.

Be ready for any situation with the Aero First Aid Station. Its versatility and extensive supply range make it ideal for various environments, ensuring that you can handle emergencies with confidence and efficiency.

Maximum Versatility: Designed with your needs in mind, the Aero First Aid Station is suitable for up to 12 interchangeable modules, each crafted to meet diverse compliance standards. From minor cuts and abrasions to eye injuries, trauma, burns, and snake bites, this station has you covered.

Beyond Basic Care: More than just a first aid kit, the Aero First Aid Station supports additional safety measures. It includes space for eye wash bottles, defibrillators, and bleed control kits, making it a comprehensive workplace safety solution.

The Aero First Aid Station includes the following modules:

- Eye Wound Module
- Trauma Module
- Burns Module
- Snake Bite Module
- Cuts & Grazes Module
- Dressing & Bandage Module

*Defibrillator, Bleeding Control Kit and Eyewash Bottles are sold separately.

A welder wearing a red hard hat and dark clothing is working on a large, complex metal component in a factory. The welder is using a tool, likely a torch or welding rod, to work on the component, which is emitting a large amount of bright sparks. The background is dark and industrial, with some blurred lights and structures. A yellow banner with white text is overlaid on the image.

A close-up photograph of a person's hands wearing white, textured nitrile gloves. The hands are holding a large, white, rectangular piece of fabric with a fine, grid-like texture, possibly a medical drape or a protective barrier. The fabric is held taut, showing its texture and some creases. The background is a plain, light gray surface.

A high-angle, black and white photograph of a rescue operation on a rocky, uneven terrain. A rescuer, wearing a helmet, safety glasses, a light-colored long-sleeved shirt, and a harness, is focused on managing ropes. To the left, a stretcher is positioned, with a patient lying inside. The patient is wearing a helmet and appears to be unconscious. The rescuer is holding onto a rope that is part of a larger system, likely used for lowering or raising the stretcher. The background shows the rugged, textured surface of the rock.

FIRST AID ROOM SETUP

First aid facilities

Aero Healthcare offers a comprehensive range of first aid room equipment and supplies designed to support mining operations of all sizes. From essential treatment furniture and emergency equipment to clinical consumables and infection control products, our solutions help ensure your first aid facilities are prepared to respond to a wide range of workplace incidents.

Our products are selected to meet the demands of remote and high-risk environments, supporting compliance with workplace health and safety requirements while helping maintain a safe and well-prepared site.

Location and size of the room should allow easy access and movement of injured people, noting they may need to be supported or moved by stretcher or wheelchair.

A first aid room is recommended for:

LOW RISK WORKPLACES

with 200 workers or more

HIGH RISK WORKPLACES

with 100 workers or more

CHECKLIST

The following items should be provided in the room:

- A first aid kit appropriate for the workplace
- Hygienic hand cleanser and disposable paper towels
- An examination couch with waterproof surface and disposable sheets
- An examination lamp with magnifier
- A cupboard for storage
- A container with disposable lining for soiled waste
- A container for the safe disposal of sharps
- A bowl or bucket, minimum 2 litres capacity
- Electric power points
- A chair and a table or desk
- A telephone and/or emergency call system, and
- The names and contact details of first aiders and emergency organisations.

A first aid room should:

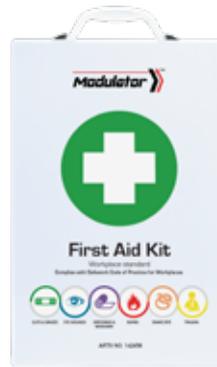

- Be located within easy access to a sink with hot and cold water (where this is not provided in the room) and toilet facilities
- Offer privacy via screening or a door
- Be easily accessible to emergency services, with a minimum door width of 1 metre for stretcher access
- Be well lit and ventilated
- Have an appropriate floor area, 14 square metres as a guide, and
- Have an entrance that is clearly marked with first aid signage.
- Maintaining a first aid room should be allocated to a trained first aider, except where this room is part of a health centre or hospital.
