

QUICK RELEASE TOURNIQUET

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

The AeroRescue™ Quick Release Tourniquet in green supports significant or major bleeds occurring on the arms and limbs. This tourniquet is an essential item for many first aid kits, from workplaces that deal with sharp instruments to emergency service workers. Its latex-free design also avoids irritation on the skin, especially for those who suffer from skin-based complaints and allergies. The AeroRescue™ Quick Release Tourniquet is designed to stem blood flow from open wounds, allowing first responders and emergency workers to control the bleeding. It has also been produced to avoid snagging or pinching the skin upon application. This piece of equipment can offer potentially life-saving treatment for those who have suffered traumatic wounds with excessive bleeding.

AVAILABLE IN:
