

## CLEAR-GUARD™ 3 BAG VALVE MASK FILTER

- ✓ UKCA Marked
- ✓ CE Marked

**Clear-Guard™ 3 Bag Valve Mask Filter** delivers superior protection, making it an indispensable element of respiratory and anaesthetic systems. Engineered specifically to meet the rigorous demands of the medical field, it acts as a reliable shield against microbial contamination, ensuring the safety of patients, healthcare providers, and vital equipment. It features an ergonomically rounded polypropylene housing. This filter is a cost-effective filtration option that doesn't sacrifice on quality. Featuring a built-in 90° elbow simplifies assembly by eliminating the need for extra catheter mounts or elbows, thereby easing setup and enhancing patient comfort. Ideal for situations where minimal dead space is crucial, particularly in anaesthetic procedures within operating theatres, intensive care units, anaesthesia departments, and any clinical setting requiring stringent air filtration to protect against microbial contamination. Seamlessly integrates into a wide array of airway and breathing management solutions. Inclusion of a luer port in this model enhances its utility in various medical settings, offering a standardised, secure connection for sampling, monitoring, and administering medication directly into the breathing circuit.
