

## FINGER DRESSINGS

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

The AeroWound™ Wound Dressings are a general-purpose wound dressing for use in preventing infection and controlling bleeding. Available in sizes to suit wounds from finger injuries to large wounds. It is unique in the industry for its ability to treat finger wounds too large to cover with an adhesive dressing. This unique product combines a 4.5cm square low adherent and absorbent pad, with a wrapping leader and secure adhesive tab to protect the wound.

Highly absorbent wound pad controls bleeding and absorbs wound exudates. Special low adherent coating minimizes wound trauma associated with changing dressings. Dressings are available individually on demand in an easy-tear wrapper and sterile for wound cleanliness. The wound pad is attached to a wrapping leader of a gauze bandage making the dressing simple to apply, yet comfortable and secure for all general wound dressing.
