

HOT COLD PACK

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Recommended for the treatment of swelling, the AeroCool™ Hot Cold Pack also offers a portable solution for sufferers of muscular pain. Essential for any first aid kit, the AeroCool™ Hot Cold Pack is also ideal for those who carry transportable first aid equipment, such as outdoor pursuits instructors or those on expeditions. It includes a soft towel cover for added comfort upon use, and to avoid direct exposure to hot and cold temperatures on the skin. The AeroCool™ Hot Cold Pack can be heated in a microwave or chilled in a domestic freezer before use. Heated packs can be used to treat muscular pain, whilst cold packs are suitable for treating swelling. It is ideal for relieving pain. Individual packs contain one AeroCool™ Hot Cold Pack suitable for relieving muscle pain and reduce swelling.
