

Low-Adherent Burn Dressing

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

AeroBurn™ Burn Sheets are sterile, latex-free sheets designed to protect burn wounds while providing user comfort. Coated with a low-adherent material, they minimize trauma during removal and form a non-adherent barrier to prevent infection. Made from premium quality materials, AeroBurn™ burn sheets conform to body contours for increased convenience and patient comfort. They can be easily folded or cut to size, making them suitable for various wound sizes, while their sterile nature reduces the risk of secondary infection.
