

## LOW ADHERENT PADS

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Suitable for wound protection and minimising further trauma, the AeroPad™ Low-Adherent Dressing includes a low-adherent film that prevents the dressing from sticking to the wound. Each dressing from the box is classified as sterile before use. For users that suffer from skin complaints, the dressings are marked as latex free. The dressings offer a premium solution for wound care. This makes our AeroPad™ Low-Adherent Dressing a necessary component of any first aid kit, especially when it is used by a diverse group of people. The AeroPad™ Low-Adherent Dressing is ideal for protection against bacteria and recommended for treating cuts, grazes, and minor burns. Thanks to its premium quality and superior absorbency factor, the dressings are ideal for weeping and bleeding wounds, offering optimal protection and comfort for the user. Individual packs contain 50 pieces each that are suitable for wound protection and recommended for treating cuts, grazes, and minor burns.
