

MICROPOROUS MEDICAL PAPER TAPE

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

The AeroPore™ White Microporous Paper Tape offers greater ease for dressing changes and wound care. Recommended for securing dressings and medical equipment, the tape is suitable for use on fragile and sensitive skin. The nature of the adhesive means it can also be used on the face. Equipped with SupaBond™ hypo-allergenic adhesive, the AeroPore™ White Microporous Paper Tape is engineered for low irritation and optimal adhesion, minimising lift up or edge curling. For even greater convenience, the paper tape can be cut or ripped to the exact size required. This offers greater ease for wound care treatment as the tape can be used to secure dressings, swabs or gauze that are non-adhesive. It also ensures minimal wound care trauma around wound sites thanks to its gentle and fragile nature.

AVAILABLE IN:
