

NON-WOVEN SWABS - STERILE AND NON-STERILE

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Offering gentle application, the AeroSwab™ Non-Woven Swabs are ideal for wounds and medical stitches. The swabs also offer premium quality that guarantees optimum comfort and performance as a product. For those suffering from sensitive wounds, this makes dressing changes anxiety-free and comfortable. There is also no likelihood of snagging against surgical stitches or wounded skin. This makes dressing changes painless. Suitable for application over sensitive wounds such as surgical stitching or healing scars, the AeroSwab™ Non-Woven Swabs provide effective protection against bacteria. They also protect any weeping or bleeding wounds from exposure thanks to their four-ply design. Their non-woven, virtually lint-free design also provides excellent release during dressing changes
