

TRIANGULAR BANDAGES

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Essential for any first aid kit, our **AeroBand™ Triangular Bandages** offer excellent support to first aiders. Available either as non-woven for single-use or cotton calico reusable triangular bandages, they can both be used as an immobilisation tool, whilst also ensuring support for arms when used as a sling. The function of these triangular bandages can also be used for shoulders and ribs. This bandage is durable and can offer significant support to a casualty whilst expert medical care is on its way. It can also be used as a large dressing to keep sterile pads in place or to fully support injured or wounded limbs. Designed for single use, the AeroBand™ Non-Woven Triangular Bandage must be disposed of after it has been used on a casualty, even if it has only been used as a sling. Our AeroBand™ Cotton Calico Triangular Bandage can be washed and re-used multiple times as a non-sterile alternative to our sterile Non-Woven Triangular Bandage.
