

WATERPROOF ISLAND DRESSING

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

The AeroFilm™ Plus Waterproof Dressing is a sterile, transparent dressing suitable for covering IV lines, cannulas, clean skin and surface wounds. Its breathable design also offers an anti-bacterial barrier for external contaminants. Marked as latex free, the SupaBond™ extra-strong adhesive is also hypo-allergenic, which means the dressing is suitable for a wide range of users, especially those that suffer from skin complaints and allergies. The adhesive ensures durability, which helps to preserve the wound site from wound trauma and bacteria. It also minimises the need for dressing changes as the site is kept clean and dry. The AeroFilm™ Plus Waterproof Dressing includes an ultra-thin, waterproof layer that reduces the risk of skin and wound trauma. The AeroFilm™ layer also protects the dressing and wound whilst the casualty or patient is showering or bathing, removing the need to change the dressing.
