

SEAL OTC Hemostatic Spray

Code: BC30015FP

SEAL 1.5oz Hemostatic Spray is a single-use, patented, fast-acting, over-the-counter (OTC) solution designed to stop bleeding from minor cuts to more serious wounds, right when and where you need it.

Using advanced chitosan technology, SEAL forms a protective barrier that promotes natural clotting and shields wounds from contaminants. The fine mist spray allows for hands-free, non-contact application, making it ideal for quick response in stressful situations.

Compact, lightweight and easy to carry, this 1.5oz can is the perfect addition to your home first aid kit, travel bag, glove box, or hiking pack.

- ✓ **Rapid Action:** Works on contact to accelerate the body's natural clotting process, significantly reducing blood loss.
- ✓ **Easy to Use:** Simply spray directly onto a bleeding wound for fast-acting bleeding control.
- ✓ **Compact and Portable:** The 1.5oz can is designed for easy storage in any first aid kit, backpack, or glove compartment.
- ✓ **Versatile Use:** Ideal for a wide range of situations, including home injuries, outdoor activities, and sports.

How It Works

Shake the can

Activate the formula by giving it a good shake.

Spray directly on the wound

Hold 6–10 inches away and apply a steady spray to fully cover the bleeding area.

Let it work

Chitosan binds to blood cells and platelets, forming a fast, stable clot.

Seek care if needed

For deeper or more serious wounds, follow up with professional medical attention.
